

Global Superstore Project

Project Description: Developed an interactive sales and profitability dashboard using WPS Spreadsheet/Excel and the Global Superstore dataset containing 51,290 transactions. Cleaned and validated the data, calculated key performance indicators, and used PivotTables and charts to analyze sales, profit, discounts, categories, products, and regional performance. Identified loss-making products, weak-performing sub-categories, and the relationship between high discounts and lower profitability. Provided business recommendations related to pricing, discounts, shipping costs, and regional performance.

- ◆ Cleaned and validated a 51,290-record Global Superstore dataset using WPS Spreadsheet/Excel.
- ◆ Built an interactive dashboard to analyze sales, profit, discounts, categories, products, and regional performance.
- ◆ Identified loss-making products and weak-performing areas, and provided recommendations related to pricing, discounts, shipping costs, and profitability.

Project Skills Demonstrated

- Data cleaning and validation
- Excel/WPS Spreadsheet formulas
- PivotTables and PivotCharts
- KPI calculation
- Dashboard creation
- Business insights and recommendations
- Sales and profitability analysis
